

Experience

For over 35 years, R-V Industries has partnered our top-notch engineering with our manufacturing expertise to produce a quality product with extensive technical service and repairs. We offer:

- World class manufacturing capabilities
- Custom design and fabrication services
- U, S, and UM ASME certification
- National Board R stamp for repairs

We will work closely with you to ensure your process, design, manufacturing, and budget requirements are met.

Design

Our engineering team is comprised of an experienced and cross-trained staff. R-V uses the latest in engineering software technology to provide visual validation of the finished product.

Specializing in Pressure Vessel and Non Pressure Vessel Equipment:

- Reactors
- Tanks
- Vessels
- Columns
- Spool Pieces
- Structural Systems
- Ladders and Platforms

Superior Products • Competitive Price • With Integrity

Fabrication

R-V has participated in numerous proprietary projects across many different industries, including oil & gas, food & beverage, pharmaceutical, nuclear, and specialty chemical industry. Platforms, insulation, jacketing, and internal agitators are just a few of the specialized accessories we supply.

We use high quality carbon, stainless and duplex steels, as well as, nickel and copper alloys, and clad materials.

Finishing

Choices include:

- Mill Finish
- Mechanical Polishing to 3-5 Ra
- Electropolishing
- Citric Acid and Chemical Passivation
- Glass Bead Finish
- Standard or Special Coatings Available.
