### R-V INDUSTRIES TO IMPLEMENT NQA-1 PROGRAM

R-V Industries, Inc., a diversified engineering and manufacturing company, is pleased to announce we have enhanced our quality assurance program by implementing procedures to become NQA-1 compliant. R-V expects the implementation and certification process to be totally complete by mid-October of this year. While complementing all of our current engineering and manufacturing strengths, this new certification allows R-V to service a broader range of customer requirements.

R-V Industries, Inc. wants to be your source for any current or upcoming NQA-1 needs. Our Quality Assurance Manual and related procedures are now available for review. We will begin scheduling audits, as necessary, in October.

We are excited about the opportunity to expand our services for our existing client base as well as the potential new business this program will offer. For more information or to schedule an audit, please contact Mr. Chris Wuertz as listed below.
