

R-V INDUSTRIES, INC.

***World Class ASME Pressure Vessel
Design & Fabrication***

Your Solution for ASME Code Pressure Vessel Design & Fabrication

For 30 years R-V Industries has partnered our engineering and manufacturing expertise with customer ideas to produce a quality product.

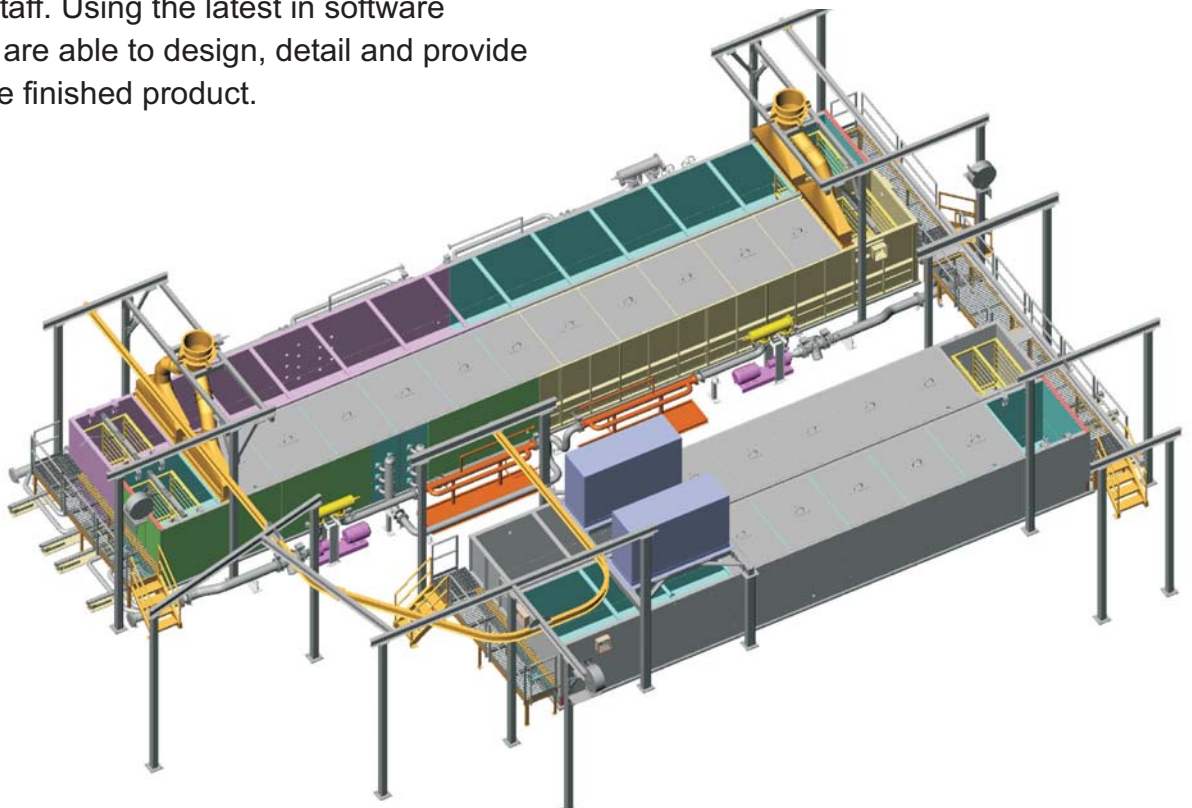

We offer:

- World class manufacturing capabilities
- Custom design and fabrication services
- U, S, UM ASME certification
- National Board R stamp for repairs

We work closely with you to develop the effective solutions for your process, design, manufacturing and budget requirements.

Design

Our engineering team is comprised of an experienced, cross-trained staff. Using the latest in software technology we are able to design, detail and provide validation of the finished product.

Fabrication

R-V Industries has participated in numerous proprietary projects in the pharmaceutical, food, beverage and specialty chemical industry. Platforms, insulation, jacketing and agitators are just a few of the specialized accessories we have supplied.

We use high quality carbon, stainless steel and duplex steels, as well as, nickel and copper alloys and clad materials.

Finishing

Choices include:

- Mill Finish
- Mechanical Polishing to 3-5 RA
- Electropolishing
- Citric acid and chemical passivation
- Glass bead finish
- Standard or specialty coatings available

Lab Prototypes

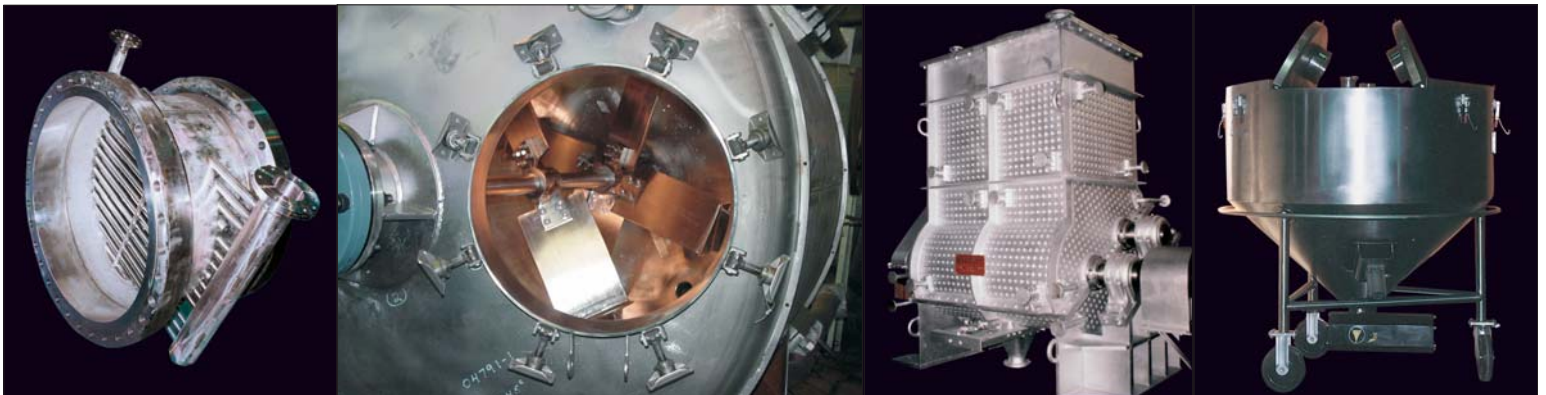

Autoclaves

Reactors

Field Repair
