

DRIP SCREENS AND SEAL PLATES

R-V flexible drip screens last longer than traditional OEM screens, which are susceptible to OEM screen distortion. Maintenance time is reduced by providing access to the seal trough by rolling up and securing the screen using S-hooks.

Flexible Drip Screen Benefits

- Easy Installation - screens ship with attachment bar to easily bolt onto your mounting apparatus
- Reduced Maintenance - flexible design allows screens to be rolled up and secured with S-hooks
- Improved Durability - corrosion and heat resistant screens handle the ash hopper's difficult conditions that cause other rigid screens to warp
- Material Options - 304 S/S, 316L S/S, 317L S/S, 430 S/S and various Inconel grades
- Design Feature - dual layer design is supplied with an open bottom

DRIP SCREENS AND SEAL PLATES

R-V's seal plates are manufactured to original equipment specifications and are adaptable to any furnace design. Material options include, but are not limited to:

- 316L stainless steel
- Inconel 600
- Inconel 601
- Inconel 625
- AL6XN
- Carpenter 20
