

OVERFIRE AIR WINDBOXES

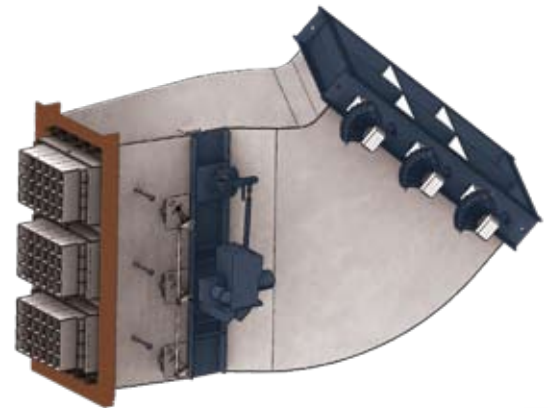

SOFA Windboxes

Separated overfire air windboxes with directional air control. Available with automatic remote adjustment of vertical tilt and horizontal yaw.

R-V designs and manufactures complete windbox assemblies for coal, oil and gas-fired tangential furnaces. Our expertise includes both mechanical and performance design. New windboxes are fitted with the latest components for emission control and long term reliability.

Replacement windbox for a 450 MW oil-fired unit
