

Whizzer Wheel Assemblies

R-V has furnished fan spiders, whizzer discs, fan blades, and complete whizzer wheel assemblies since 1981. We also offer individual ceramic-lined components or complete assemblies static balanced and ready for installation.

R-V's ceramic whizzer wheel assembly highlights an aggressive ceramic design. Vacuum bonded blades are furnished in ceramic or combined with tungsten carbide tips as shown above. Our spider has a unique one-piece ceramic-lined replaceable liner. The assembly is complete with ceramic whizzer blades and a ceramic whizzer disc. Your individual design preferences may be incorporated into any of R-V's whizzer wheel assemblies.
