

● ● TL ROLLS

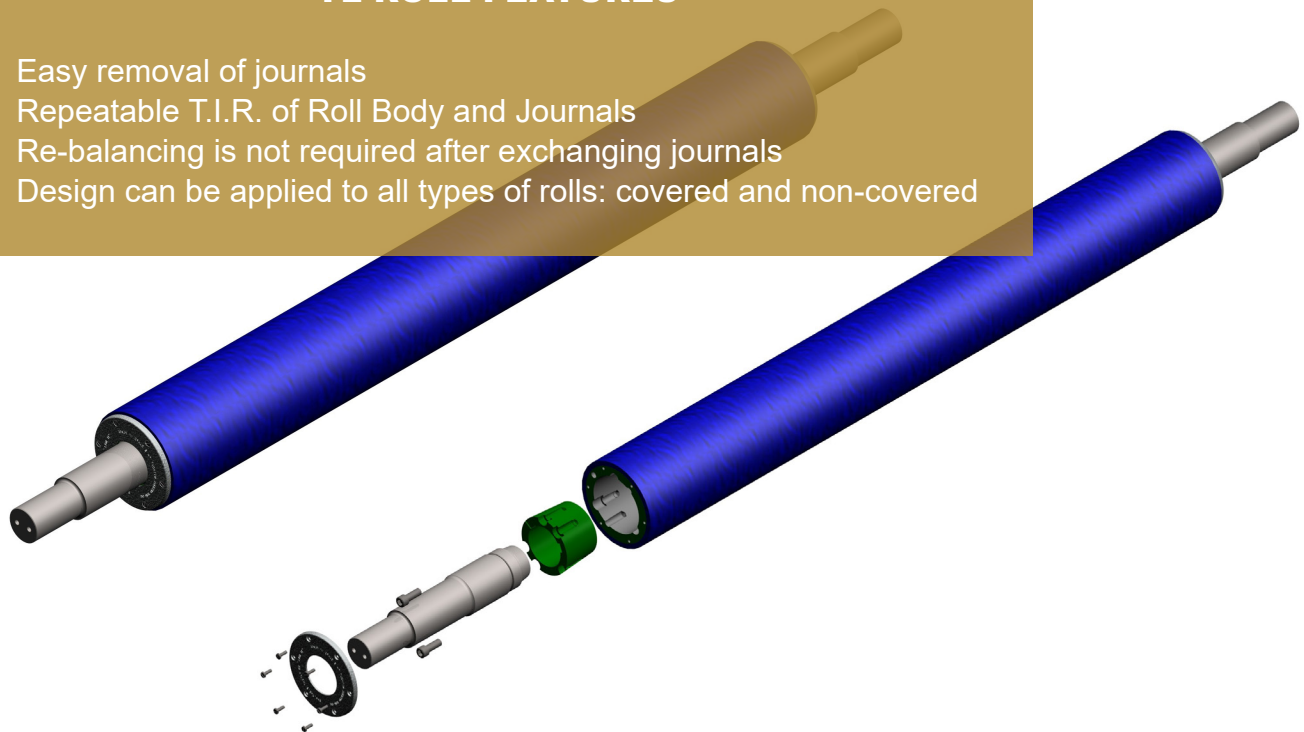

DESIGNED FOR MAINTENANCE AND INVENTORY STORAGE

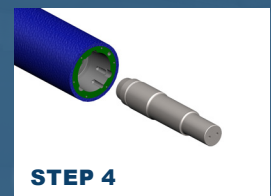

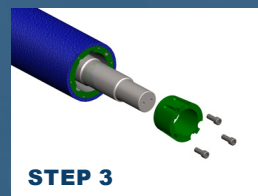

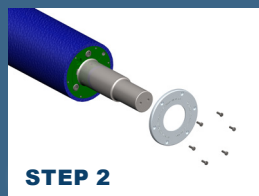

R-V Industries' patented TL Roll was designed and engineered for ease of maintenance and efficient storage of spare inventory. It has removable and interchangeable journals, yet maintains balance and T.I.R. quality. The roll easily converts to a drive roll by a simple journal exchange. In fact, journals can be exchanged while the roll is still in the machine.

TL ROLL FEATURES

Easy removal of journals
Repeatable T.I.R. of Roll Body and Journals
Re-balancing is not required after exchanging journals
Design can be applied to all types of rolls: covered and non-covered

SEQUENCE OF TL ROLL REMOVAL
