

# Automatic Guide Accessories

R-V Industries offers the accessories to complete your Automatic Fabric Guide package. The Thru-Flo Model 200<sup>®</sup> controller's compact design is reliable and virtually maintenance-free. Its sensitivity of response and precision is superior to other units currently in use.

## Features

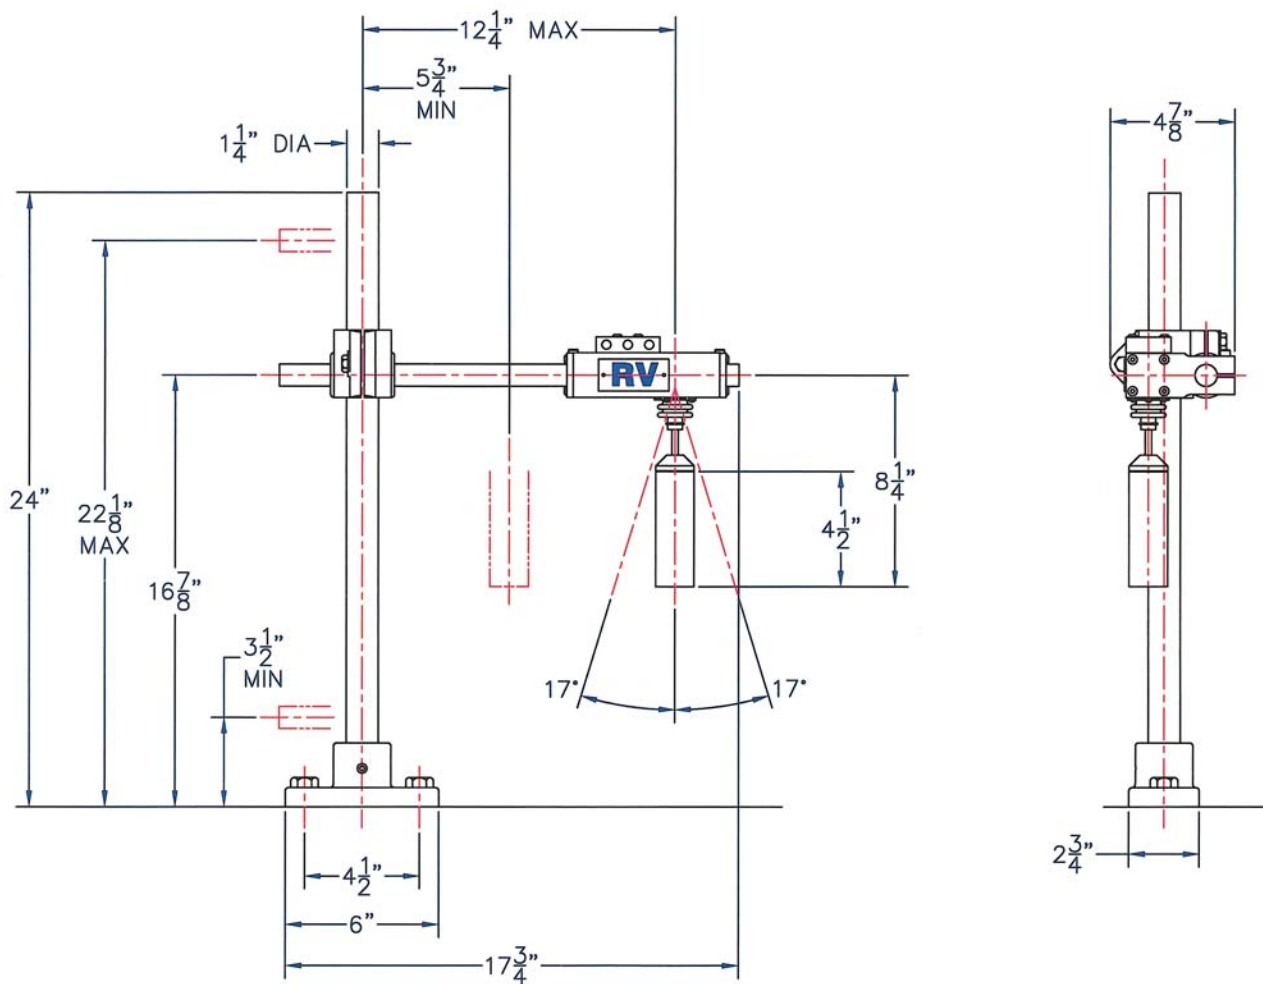

1. Controller has minimal operating parts.
2. No bench calibration required for controller.
3. Stand made of corrosion-resistant material.
4. Optional ceramic-coated flat palm.

# Automatic Guide Accessories

## Selection Criteria

To select your guide controller specify the following:

- ✓ The type of operated guide
- ✓ Palm options
  - ✓ Flat palm
  - ✓ Rotary palm

\* Accessories may be purchased separately or as a package. Packages include guide controller, flat or rotary palm, mounting stand, filter/regulator and failsafe valve. Cost of accessory package reduced if purchased with Auto Guide.

\* Maintenance kits also available.
