

R-V INDUSTRIES, INC.

World Class NQA-1 Fabrication

TO SUPPLY
SUPERIOR PRODUCTS
AND SERVICES AT
A COMPETITIVE
PRICE WITH INTEGRITY

Our Project List Includes:

Agitators & Seismic Bumpers

Bi-Cell Tanks

Drive Stands

Dryer Strongbacks

Lifting Devices

Platform Assemblies

Pump Components

Slab Tanks

Storage Casks

Test Fixtures

Transportation Containers

Waste Containers

Partnership Promise

That's Our Philosophy

For over 40 years R-V Industries, Inc. has partnered our engineering and manufacturing expertise with customer ideas to produce a quality product. We work closely with you to develop efficient equipment solutions for your process, design, and manufacturing. By partnering our knowledge and experience with your specifications we can custom design and manufacture your equipment to the highest level of satisfaction.

R-V Industries, Inc. Nuclear Quality Assurance program reflects our understanding of the quality assurance requirements necessary to safely design and manufacture to NQA-1 standards.

We offer:

- World class manufacturing capabilities
- Custom design and fabrication services
- National Board R stamp for repairs
- ASME - U, and S stamp

NQA-1
QUALIFIED

Engineering & Design

Design

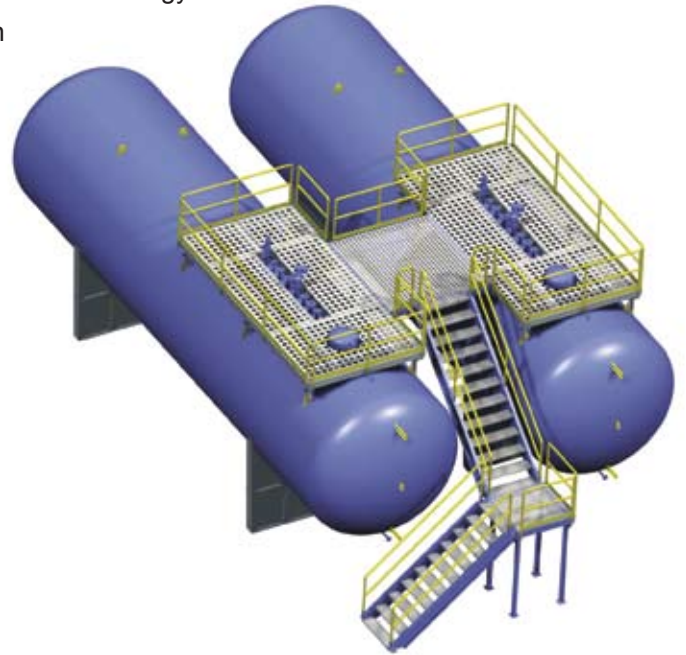

Our engineering team is comprised of an experienced, cross-trained staff with an innovative approach to providing sound, cost effective machinery designs.

We are equipped with the latest advancements in software technology which enables us to design, detail and provide validation of the finished product.

Combining our diverse backgrounds of engineering, fabrication, and machining results in practical solutions for a variety of industrial applications.

We provide **expertise** in these areas:

- Pressure Vessel Design
- Research & Development Projects
- Machine Design
- 3-D Modeling
- Finite Element Analysis
- Structural Design & Detailing
- Systems Control & Programming

Materials include common grades of stainless steel and specialty alloys such as:

- RA 253 MA
- 353 MA
- AL6XN
- 17-4 PH
- Duplex Materials
- Inconel
- Hastelloy
- Monel
- Many Others

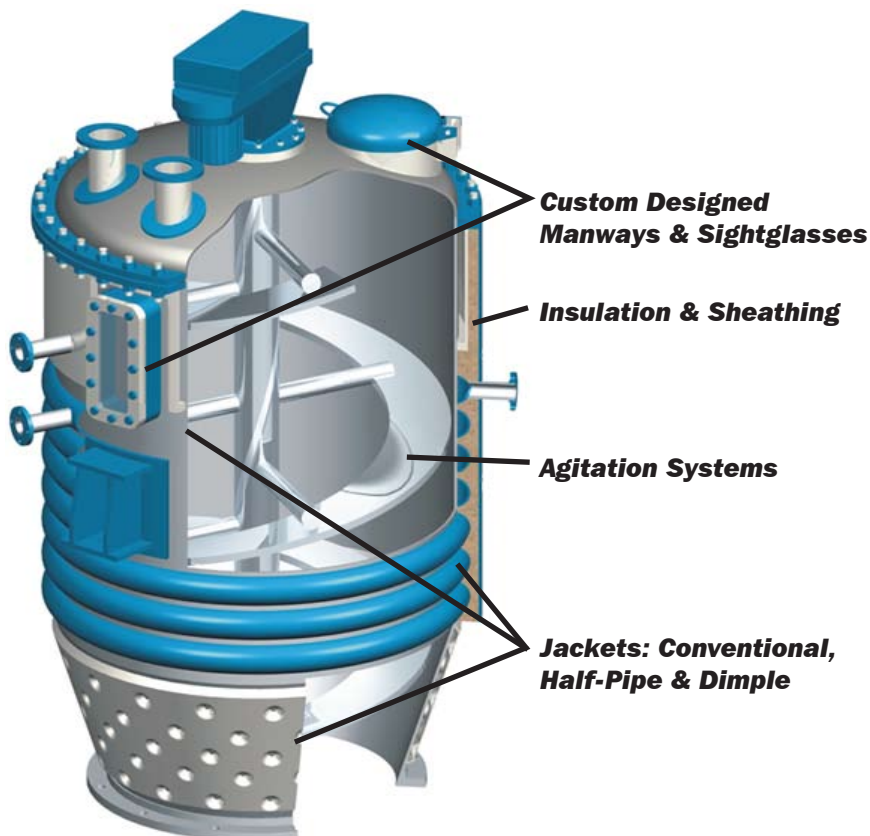

Fabrication & Machining

Research & Development Projects

R-V Industries has participated in numerous research and development projects including: Reactors, Ammonia Vessels, Columns, Vacuum Vessels, Lab Prototypes, and Field Repairs. We offer conventional, half-pipe and dimple-jacketed vessels. Our World Class manufacturing capabilities are evident in each piece of specialized equipment we produce.

Our welders are qualified to weld procedures certified to the ASME Code. Processes include FCAW, GMAW, GTAW, SAW and SMAW.

We offer complete fabrication, machining, assembly and finishing services. These services are supported by our sales, engineering and project management team. The result is a comprehensive and customized service that meets the challenge of demanding project schedules while maintaining a top quality product.

Committed to Safety

Committed to Safety

At all levels of our organization, quality and safety is a top commitment. R-V Industries, Inc. of Honey Brook, has been awarded the SHARP certification (Safety & Health Achievement Recognition Program) through OSHA. This rating has been achieved by less than 50 other companies in Pennsylvania.

The certification required R-V to undergo a series of inspections and interviews and also work with the Indiana University of Pennsylvania for OSHA consultation. SHARP recognizes all employers who operate an exemplary safety and health management system. Our acceptance into SHARP by OSHA is an achievement of status that singles us out among business peers as a model for worksite safety and health.

Our Facilities

Manufactured in the USA

Our three facilities include over 160,000 sq. ft. of manufacturing and product storage space in Southeastern Pennsylvania. With a plate to product approach to manufacturing, our products are built to the highest levels of quality with in-house welding, machining, assembly, and testing services. In addition, our sales and project management teams are experienced in NQA-1 manufacturing, ready to answer questions about your project during the production process.

Top quality is not just a saying, it's our commitment. A commitment to excellence that has carried us through over 40 years of manufacturing, and it's what we promise to deliver to our customers.
